**Description:**

Tuk Tuk is an innovative mobile application designed for the booking of three-wheeled taxis, offering a seamless and enjoyable transportation experience for passengers in Sri Lanka. The application features a range of functionalities, including route planning, real-time vehicle tracking, and secure ride bookings, thereby ensuring that users can navigate their journeys with ease and confidence.

To log in to the Tuk Tuk app, users are required to enter their phone number and instantly receive a OTP for verification. This two-step authentication process ensures the security of user accounts and enhances the overall safety of the application.

The app is organized into four primary navigation sections: Ride, History, Problem, and Account. Its user-friendly interface and smooth performance enhance accessibility for all users. Within the application, users can conveniently view their ride history and report any issues related to rides or app functionality and they can edit their profile information. Additionally, Tuk Tuk allows users to log in for a personalized travel experience, granting access to essential transportation information.
